

North Atlantic Fire Science Exchange

Working Groups

Northeast Fire & Fire History Working Group

Exploring connections between fire ecology, climate, cultural traditions, and outreach, with the broader goal of shaping the future of fire-adapted landscapes. The group offers mini-symposiums, field trips, and a listserv to help build a knowledge base of fire history.

Southern Pine Beetle Working Group

Designed to establish a community of practice around pitch pine barren management in light of southern pine beetle (SPB). The group offers resources and documents related to SPB and hosts webinars to provide updates related to SPB in the region.
